

The Institute for International Research  
is pleased to announce its

7th Annual

# Trade Execution Congress

April 15-16, 2002  
The Crowne Plaza  
New York, NY

Ensure you are updated on the latest strategies, technology and trends in trade execution. Join leading experts and your peers in discussing how you can:

- **Operate on the new T+1 timeline: How the events of 2001 have changed our goals and how you can ensure you will be on target for 2005**
- **Implement intelligent order routing systems to take advantage of decentralized liquidity pools**

#### Managing Global Risks, Fulfillment and Execution Standards

- Achieving round the clock execution and fulfillment on an STP timeframe
- Managing global settlement risks, time delays and failure rates
- Assessing global execution standards and experiences with present systems
- Forming an integrated understanding of trading and settling international transactions
- Following the chain of information flow — from market to broker, to client, to global custodian, to local sub-custodian-and formulate risk and cost control strategies
- Determining how the internet is being used to solve global execution concerns

Graciela Chichilnisky, CEO and Founder
